Listing of Claims:

This listing of claims reflects all claim amendments and replaces all prior versions, and listings, of claims in the application. Material to be inserted is in **bold and underline**, and material to be deleted is in **strikeout** or (if the deletion is of five or fewer consecutive characters or would be difficult to see) in double brackets [[]].

- 1. (Previously Presented) An absorbent composition for use in a children's amusement device, the composition consisting essentially of a granular mixture comprising a superabsorbent polymer, a gum, gelatin and a binder.
- 2. (Original) The composition of claim 1, wherein the binder includes a film-forming resin.
- 3. (Original) The composition of claim 2, wherein the resin includes a copolymer of vinylpyrrolidine and vinyl acetate.
- 4. (Original) The composition of claim 1, wherein the composition further includes a colorant.
- 5. (Original) The composition of claim 1, wherein the composition further includes a plurality of reflective particles.
- 6. (Original) The composition of claim 5, wherein the reflective particles include glitter.
- 7. (Original) The composition of claim 1, wherein the composition further includes a preservative.

- 8. (Original) The composition of claim 7, wherein the preservative includes preserving agents selected to preserve the composition in a dry and a liquid state.
- 9. (Original) The composition of claim 1, wherein the composition has a pH in the range of approximately 7-7.5.
 - 10. (Cancelled)
- 11. (Original) The composition of claim 1, wherein the superabsorbent polymer contains no water-extractable material.
- 12. (Previously Presented) The composition of claim 1, wherein the superabsorbent polymer consists essentially of particles in the range of approximately 100 microns and approximately 300 microns in maximum diameter.
- 13. (Previously Presented) The composition of claim 1, wherein the superabsorbent polymer consists essentially of particles in the range of approximately 175 microns and approximately 225 microns in maximum diameter.
- 14. (Original) The composition of claim 1, wherein the gum is selected to absorb glycols.
- 15. (Currently Amended)The composition of claim 1, wherein the gum is includes guar gum.

16. (Previously Presented) The composition of claim 2, including superabsorbent polymer, gum, gelatin and film-forming resin in the ranges of percentages by weight listed:

Component	Percentage (wt %)				
superabsorbent polymer	30	to	55		
gum	1	to	10		
gelatin	20	to	50		
film-forming resin	5	to	25		

17. (Previously Presented) The composition of claim 2, including superabsorbent polymer, gum, gelatin and film-forming resin in the ranges of percentages by weight listed:

Percentage (wt %)				
35 to 55				
1.5 to 10				
25 to 45				
10 to 20				

18. (Original) The composition of claim 2, further including glitter, colorant and preservative, wherein the superabsorbent polymer, gum, gelatin, film-forming resin, glitter, colorant and preservative are in the ranges of percentages by weight listed:

Component	Percentage (wt %)				
superabsorbent polymer	15	to	45		
Gum	0.5	to	5		
Gelatin	15	to	35		
film-forming resin	2	to	20		
preservative	0.5	to	15		
Glitter	5	to	30		
Colorant	0.01	to	5	* * * *	

19. (Original) The composition of claim 2, further including glitter, colorant and preservative, wherein the superabsorbent polymer, gum, gelatin, film-forming resin, glitter, colorant and preservative are in the ranges of percentages by weight listed:

Component	Perce	e (wt %)	
superabsorbent polymer	25	to	40
gum	0.5	to	3
gelatin	20	tō	30
film-forming resin	5	to	15
preservative	1	to	10
glitter	10	to	25
colorant	0.03	to	1.5

- 20. (Previously Presented) The composition of claim 1, wherein all omponents of the composition are granular.
- 21. (Previously Presented) The composition of claim 4, wherein the colorant has a color that is not readily perceivable to a user until a water-based fluid is added to the composition.

- 22. (Previously Presented) The composition of claim 5, wherein the plurality of reflective particles are configured to move with other components of the composition when the composition absorbs a volume of water-based fluid.
- 23. (Previously Presented) The composition of claim 1, wherein the composition further includes a colorant and a plurality of reflective particles.
- 24. (Previously Presented) The composition of claim 2, wherein the resin is adapted to adhere the superabsorbent polymer and the gelatin when a volume of water-based fluid is added to the composition.
- 25. (Previously Presented) The composition of claim 1, wherein the composition is reusable and is adapted to absorb a further volume of water-based fluid after an initial volume of water-based fluid has evaporated.
 - 26-28. (Cancelled)
